Professional Summary

I specialize in delivering comprehensive mobile app development services that encompass the entire lifecycle of an app—from the initial product discovery phase and meticulous UX/UI design, through robust software development, to seamless backend integration and strategic launch planning. With a long and rich experience in mobile app development and some additional experience in product management, I am well-equipped to bring groundbreaking mobile solutions to life, from concept to a finished product in your hands.

Work Experience

Senior Software Engineer - Tebi

Dec 2023 - Present

- Mobile and back-end software development.

Projects

- [Tebi](#)

Skills

- Swift, Kotlin, Kotlin Multiplatform, KTOR, JVM

Senior Software Engineer - Freelance (Sole Proprietorship / ZZP)

Nov 2023 - Present

As a freelance Senior Software Engineer, I leverage my extensive experience to provide end-to-end solutions in mobile app development. Specializing in bringing app concepts to life, I manage the entire product lifecycle from ideation to market launch. My services encompass:

- Conducting product discovery to align with market needs and user expectations.
- Designing intuitive and impactful user experiences for mobile platforms.
- Developing and implementing robust, scalable mobile applications.
- Overseeing project management to ensure timely delivery and quality standards.
- Providing IT consulting to optimize tech strategies and operations.

With a dual background in technical development and product strategy, I offer a holistic approach to create apps that resonate with users and stand out in the competitive digital landscape.

Skills

- iOS App Development, Swift, Objective-C, Kotlin, Kotlin Multiplatform, Android, Product Management, SCRUM, Agile Methodologies, Software Development Outsourcing

Product Manager, iOS - Air Apps

Mar 2023 - Nov 2023 (8m)

- Product Management for various apps from the AirApps extensive iOS app offering.
- Leading the product effort on developing the SDK and BaaS that power all the AirApps iOS apps.
- Coming up with internal Product guidelines and how-to guides in order to streamline the Product process.

Projects

Skills

- iOS App Development, Product Management, Agile Methodologies, SCRUM, User Research, Product Discovery, Product Design

Product Manager, iOS, Web - BUX

Oct 2021 - Mar 2023 (1y 5m)

- I initiated and lead the implementation of a new feature inside the BUX mobile app which would allow users to read news related to financial products and their personal portfolios, earning calendars and more. During this project I moved from Engineering into Product.
- In my new Product role, I kickstarted and lead the efforts on bringing the BUX iOS App (that I originally built) to the big screens. Due to my extensive Engineering background I also acted as the hiring manager for the whole new team that needed to be hired.
- Initiated and lead the incorporation of BUX's first Engineering Hub outside of the Netherlands in Belgrade, Serbia and was the acting GM of the local entity.
